Winter Vacation Homework

Class : VII (2019-2020)

English

SECTION-A(READING)

I. Read the passage carefully and answer the questions that follow with the help of the given options :

Happiness is normally associated with possession of wealth, which is why people all over the world toil and employ various means to earn and enhance their income.

The poor often spend their lives in sorrow or bitterness over their lack of material wealth, or resign themselves to their fate. It need not be so. Money can certainly make life more comfortable and widen the range of opportunities available to a person for education, job training and employment, but it cannot buy happiness.

The first ever World Happiness Report, commissioned for the United Nations Conference on Happiness held earlier this year, notes that good mental and physical health, someone to count on, job security and stable families are key factors in determining the well being of individuals. At the community level, political freedom, strong social networks and absence of corruption are together more important than income for happiness.

Partly reflecting is the fact that happiness ultimately is in the mind of a man. Mental health is the biggest single factor affecting happiness in any country.

The poor usually despair over their fate when they focus on what they don't have and compare themselves with those better off than themselves.

A bird came down the walk

He bit an angle-worm in halves
And ate the fellow, raw.
And then he drank a dew
From a convenient grass,
And then hopped sidewise to the wall
To let a beetle pass
He glanced with rapid eyes
That hurried all abroad
They look like a frightened beads,

I thought
 He stirred his velvet head
 Like one in danger; cautious,
 I offered him a crumb,
 And he unrolled his feathers
 And rowed him faster home
 Than oars divide the ocean,
 Too silver for a seam,
 Or butterflies, off banks of noon,
 Leap, plashless as they swim

- Emily Dickinson
